COMPANY PROFILE

ComInTec®
Safety in Power Transmission

MecVel®
TECHNOLOGIES PVT. LTD.

COMINTEC
PROTECT, CUSTOMIZE, OPTIMIZE YOUR TRANSMISSION.

ComInTec is an Italian company specialized in the design and production of mechanical transmission components.

ABOUT US

A manufacturing company founded in 1967 by Dante Cavalli.

Today ComInTec offers high quality solutions through the design and manufacture of power transmission components.
Our special components play a vital role in the production of automatic machines and mechanical transmission machines.
These components create transmission connections, avoid accidental overloads, reduce machine downtimes, increase productivity,
and reduce maintenance and repair costs.

From 2010 onwards, a new and dynamic management generation, as consistently reinvested 15% of revenues in R&D, new equipment, latest-generation CNC machines, digitalization, marketing and state-of-the-art manufactoring facilities.

Our strengths

- Video tutorials for remote assistance and technical and commercial traning;
- Competitive even in the mid-sized series;
- 50+ years of experience and technical know-how;
- List of partners on the ComInTec website;
- Investments in social media with targeted marketing plans;
- Selection and sharing of contacts with partners;
- Area Managers supporting commercial activities and joint customer visits;
- Customization of products and advertising materials with brand partners;
- Catalogs and instruction booklets for quick access in 6 languages;

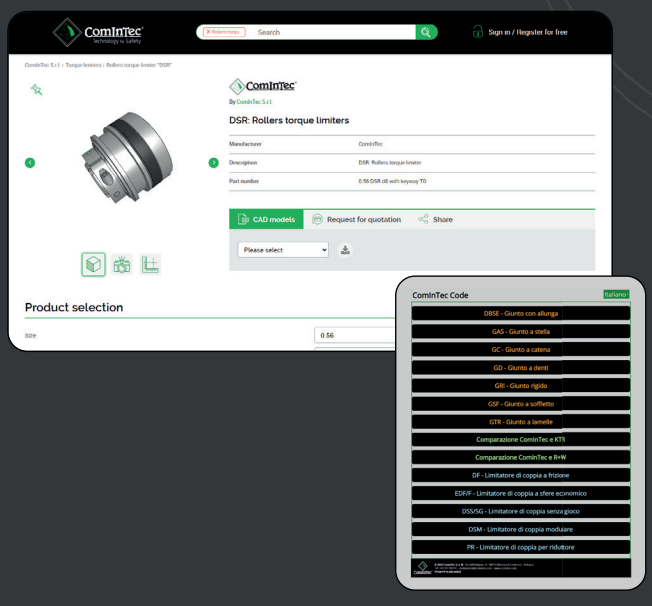
Quality and certification

R&D and customization

Worldwide sales network

Multilingual assistance

2-year warranty



Online 3D Configurator.

Our simple, fast, and free configurator provides the opportunity to create, customize and view in real-time the ideal product for your application. Additionally, it is possible to download 2D and 3D models along with their respective assembly instructions.

Online Codificator.

This new tool enables our distributors to identify the product they want to order, obtaining its corresponding code, price, and delivery times.
Along with the 3D configurator, it significantly facilitates the work of the purchasing and technical departments.

OUR PRODUCTS

Wide range of fully customizable products.

Torque limiters
Safety couplings that protect the drive train components from mechanical damage due to overload, shock and/or collisions.

Pneumatic clutches
Safety couplings with pneumatic actuation to permit torque control during motion.

Elastic and rigid couplings
Power transmission couplings. Precise and easy to assemble for connecting two mechanical shafts.

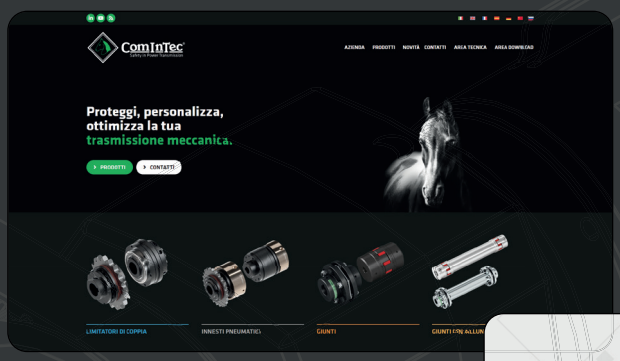
Spacer couplings
Backlash free spacer couplings to simply and quickly connect distanced mechanical transmission shafts.

Stop rings
Simple mechanical components created to simplify and improve the assembly of machines or parts of them.

Variable speed pulleys
Mechanical devices used to vary the speed quickly and continuously without interruption of motion.

INOX

STAINLESS STEEL LINE FOR THE FOOD, PHARMACEUTICAL, AND MARITIME SECTORS.



Website.

The continuously updated website allows you to explore the entire range of our Made in Italy products.
You can configure the product most suitable for your application, and through the download area, you will have access to all technical materials, catalogs, sector brochures, and instruction booklets.

App.

The brand-new app, available on Google Play and the Apple Store, provides dedicated services and tools, easily accessible for convenient and fast use.

World of ComInTec

A worldwide network
of partners and distributors
with the Headquarters located in Italy.
